Introduction

Total student credit hours offered at all USM sites is 101,087.0; 85,383.0 undergraduate and 15,704.0 graduate. An additional 548.0 USM credit hours were offered at other system-wide sites for a **total of 101,635.0 credit hours at USM** and other sites for the Fall, 2004 semester. Excluding the additional 548.0 credit hours, this Fall semester there was a total of 1506.5 credit hours more than Fall 2003; undergraduate credit hours were up by 1682.5 this semester compared to last year, but USM was down by 174.0 graduate credit hours this year from Fall, 2003.

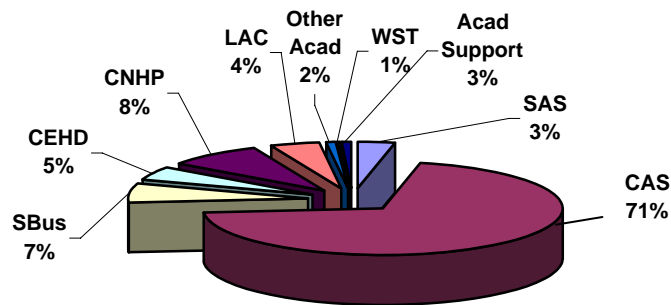

Student credit hours are distributed by academic discipline and location of course; the column headers denoting the course location and the row categories assigning credit hours by academic discipline. As an example, the column information assigns credit hours to a location because those hours were paid for by the location program. Conversely, the row information assigns those same credit hours to an academic department or program based on academic discipline. In the latter case, the student credit hours are given to an academic department and identified as having been offered at an off-campus site.

The following tables are grouped by undergraduate and graduate student credit hours. The table header lists total student credit hours and the number of FTE students by four locations - Portland/Gorham, Lewiston/Auburn, Off-Campus, and Weekend College. This information is broken down by School/ College and departmental categories.

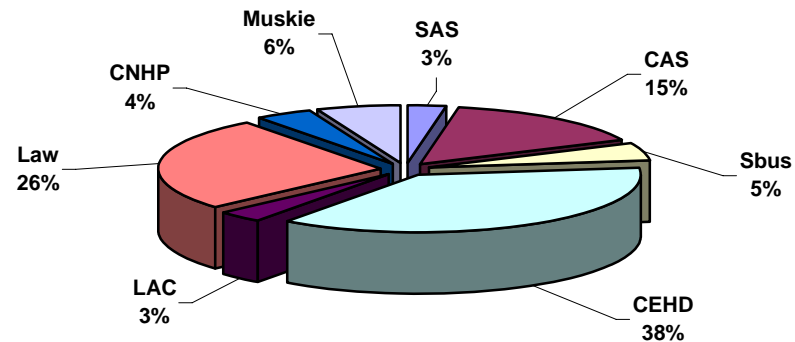

Table 1 is a summary of information found in Table 2. Tables 2.1.a-c provide undergraduate student credit hours and FTE students; Tables 2.2.a-b provide the same data for graduate level courses. Table 3.1 and 3.2 provide comparative data for student credit hours from Fall, 2000 to Fall, 2004. Again this data is grouped by graduate and undergraduate credit hours.

The two charts below provide the proportion of student credit hours distributed by program for the Fall, 2004 semester.
