Introduction

Total student credit hours offered at all USM sites is 83660.5; 71372.5 undergraduate and 12288.0 graduate. An additional 847 USM credit hours were offered at other system-wide sites for a total of 84,507.5 credit hours at USM and other sites for the Spring, 2000 semester.

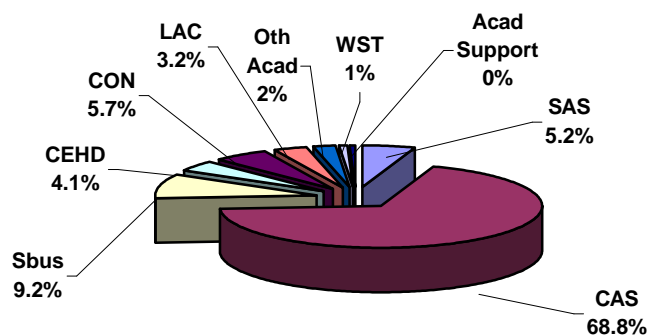

Student credit hours are distributed by academic discipline and location of course. For example, credit hours that in past years were distributed by location and course "ownership" (program paying for the course). In this scenario, a number of credit hours that were in various academic disciplines were counted as part of the credit hours for another site or program; ie., a BUS 101 01 course offered in Saco and paid for by Off-Campus Programs was credited to Off-Campus Programs and not to Business. In this report, the student credit hours are given to Business and identified as having been offered at an off-campus site.

The following tables are grouped by undergraduate and graduate student credit hours. The table header lists total student credit hours and the number of FTE students by four locations - Portland/Gorham, Lewiston/Auburn, Off-Campus, and Weekend College. This information is provided by School/College and departmental categories.

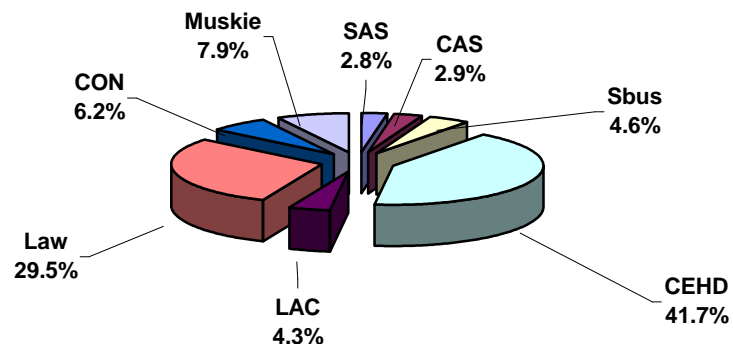

Table 1 is a summary of information found in Table 2. Tables 2.1.a-c provide undergraduate student credit hours and FTE students; Tables 2.2.a-b provide the same data for graduate level courses. Table 3.1 and 3.2 provide comparative data for student credit hours from Spring, 1997 to Spring, 2000. Again this data is grouped by graduate and undergraduate credit hours.

The two charts below provide the proportion of student credit hours distributed by program for the Spring, 2000 semester.

Percentage of Undergraduate Credit Hours by School/College Spring 2000

Percentage of Graduate Credit Hours by Department Spring 2000
