The Prior_AA 5a is required to be submitted whenever the current MDS-RCA record includes a request for correction of a prior record in the State database (i.e., a record previously submitted by the facility and accepted into the State database). When a prior record (assessment or tracking form) in the State database is determined to be in error, then the facility will request a correction to either (1) modify the record or (2) inactivate the record. The Prior_AA5a contains a key identification field for the MDS assessment or tracking form to be corrected.
<p><i>Edits</i> If AT2 is blank (no correction requested) then this value must be blank. If AT2 = 1 (modification request) or AT2 = 2 (inactivation request), then this value must match the value of AA5a submitted on the prior record, the record for which the correction request is being submitted.</p>
