Questions for Student:

Do you feel you were well-prepared academically for this fieldwork? Explain.

What courses were especially helpful to you?

What texts/resources have you found helpful?

Has the supervisory relationship been effective? How do you contribute to it?

How have you applied Clinical Reasoning skills on this affiliation? How have you dealt with Ethical Issues?

How do you incorporate psycho-social considerations into your OT evaluation and intervention?

How do you provide occupation-based interventions in this setting?

Are there other topics you wish were covered in your courses?
Questions for the Clinical Educator:

Was the student well-prepared for this fieldwork?

How is the student performing in the area of Clinical Reasoning?

How is s/he dealing with Ethical issues?

Does the student incorporate occupation-based therapy into his/her OT practice in this setting? (How?)

Does the student consider psycho-social aspects of the client's need for OT? (How?)

Has the supervisory relationship been effective? Have you used a 'Direct' leading to more 'Indirect' supervision method? If not, why not?

Strength areas of the student:

Areas to work on:

Are there specific topic areas you think should be covered in an entry-level occupational therapy program?
