GRADE POINT AVERAGES

The Registrar’s Office computes each student’s academic standing at the end of every semester, assigning a numeric value to each letter grade, where an A is worth 4.0 points and an F is worth 0.0 points. In computing the grade point average for a semester, the grade points earned in each course are multiplied by the number of credit hours assigned to that course. The resulting product is the number of “quality points” for that course. The total number of quality points earned during the semester is then divided by the total number of credits carried in that semester. The result is carried out to two decimal places.
