TECHNOLOGY ASSISTANCE PROGRAM

The Technology Assistance Program (TAP) provides interested and qualified students with the opportunity to work with USM faculty and staff to create web pages, databases and PowerPoint presentations, thereby gaining valuable technical and interpersonal experience. Staff members from Instructional Technology and Media Services (ITMS) coordinate the program. Participating students receive hourly wages from a budget managed by ITMS. The faculty or staff member benefiting from the technology assistance has no financial obligation.

Projects that relate directly to classroom instruction will receive highest priority. Other requests will be considered depending upon their complexity, urgency, and student availability. Faculty members who wish to participate in TAP should be in touch with the ITMS office at 780-4280 or 780-5356 for information and the necessary forms or visit www.usm.maine.edu/itms. Proposals are accepted on a rolling basis.
