WHERE CAN EMPLOYEES GO FOR HELP?
Each campus of the University of Maine System has designated individuals to help students and employees deal with substance abuse problems. In addition to the designated individuals, you may discuss problems with residence hall staff, counselors, or your supervisor. Those individuals can help you get assistance from a trained professional. TTY callers may leave a message for one of these individuals by calling the University of Maine System Office TTY: 973-3300. Indicate the name and campus of the person you wish to contact.

Students may contact either the Student Services Coordinator at the center or the designated campus person at the campus of enrollment.

In addition to campus resources you may find local social service agencies who can help. Consult the telephone directory. “Community Services Numbers” are listed in the front of the directory. Also see the Yellow Pages listings for Alcoholism Information and Treatment Centers and Drug Abuse and Addiction Information and Treatment.

The following state and national telephone numbers may also be helpful:
1-800-499-0027—Office of Substance Abuse Information and Resource Center, to receive information about treatment services.
1-800-662-HELP—Referral for Alcohol and Substance Abuse Services.

The Chancellor’s Office/System-wide Services of the University of Maine System does not discriminate on the grounds of race, color, religion, sex, sexual orientation, including transgender status and gender expression, national origin, citizenship status, age, disability, genetic information or veterans status in employment, education, and all other programs and activities. The following person has been designated to handle inquiries regarding non-discrimination policies: Sally Dobres, Director of Equity & Diversity, 16 Central Street, Bangor, Maine 04401, voice (207) 973-3372, TTY (207) 973-3362.
University policy recognizes that substance abuse is a complex problem that is not easily resolved solely by personal effort and may require professional assistance and/or treatment. Accordingly, each campus and System-wide Services have designated an individual to assist employees and students who seek referral for assistance with a substance-abuse problem. Students, faculty, and staff members with substance-abuse problems are encouraged to take advantage of available diagnostic, referral, counseling, and prevention services. However, employees and students availing themselves of these services will not be granted special privileges and exemptions from standard personnel practices applicable to job performance requirements and from standard academic and student conduct requirements. The University will not excuse acts of misconduct committed by employees and students whose judgment is impaired due to substance abuse.

**Alcoholic Beverages**

The sale, possession, and use of alcohol on campuses of the University of Maine System must comply with the laws of the state of Maine and with local campus regulations and procedures. The acquisition, possession, transportation, and consumption of alcohol by anyone under 21 years of age is prohibited by University policy.

Alcohol may be possessed or consumed on University property only by persons 21 years of age or older in their rooms or in appropriately licensed and/or approved campus facilities. Persons are expected to assume responsibility for their own behavior while drinking and must understand that being under the influence of alcohol in no way lessens their accountability to the University community.

**Illegal Drugs**

The possession, use, manufacture, dispensing or distribution of illegal drugs (heroin, cocaine, marijuana, LSD, steroids, etc.) is prohibited at any time on University property and as part of any University activities. "Illegal drugs" does not mean the use of drugs under a valid prescription. Employees and students known to use, possess, manufacture, dispense, or distribute illegal drugs are liable to public law-enforcement actions and University disciplinary actions.

**Sanctions**

Employees and students who violate the University's policy will be subject to disciplinary action by the University. The severity of the imposed sanctions will be appropriate to the violation; possible sanctions include suspension, probation, dismissal, restitution, official censure or reprimand, referral for prosecution, participation in a rehabilitation program, and other actions the University deems appropriate.

In November of 1988, the United States Congress enacted the Anti-Drug Abuse Act which contains a section called the "Drug Free Workplace Act of 1988." This section requires organizations receiving federal grants and contracts to ensure that their workplaces are free from illegal use, possession, manufacture, dispensation, or distribution of controlled substances.

The law requires employers who receive federal funds to:
- notify employees that drug abuse is prohibited in the workplace,
- establish a drug-free awareness program,
- require each employee to notify the University of any criminal drug conviction for violations occurring in the workplace, and
- impose sanctions or remedial actions for convicted employees.

As a result of the Anti-Drug Abuse Act of 1988, a court of law may suspend or terminate an individual's eligibility for federal benefits, including student financial assistance, if that individual is convicted of certain drug offenses.

As a University employee, the Drug Free Workplace Act requires you to notify your supervisor (for example, Department Director or Principal Investigator) if you are convicted of any workplace-related criminal drug violation. You must notify your supervisor within five calendar days after the conviction. Failure to report a conviction may be grounds for dismissal.

The University must report to the contracting or granting agency within 10 calendar days of receiving notice of the conviction.

Violations of the Drug Free Workplace Act can result in:
- disciplinary action, including dismissal
- suspension of payments under the grant
- suspension or termination of the grant
- suspension or debarment of the grantee

Maine has a medical marijuana law that permits medical use and possession of marijuana under certain circumstances. However, permitting employees or students to use or possess marijuana for medical purposes on campus would violate the federal Drug Free Workplace Act. Consequently, medical use or possession of marijuana on campus is prohibited. Employees and students who are under the influence of medical marijuana are not exempt from normal conduct and job performance standards.

MAINE DRUG LAWS

Furnishing liquor to a minor (or allowing a minor under your control to consume alcohol): up to $2,000 fine and less than one year in jail. Furnishing liquor to a visibly intoxicated person: 6 months in jail and/or $500 fine.

Maine Liquor Liability Act: civil liability for negligently or recklessly serving alcohol to a minor or a person visibly intoxicated. If property damage, bodily injury, or death results, monetary damages may be awarded. This act could apply to a person or organization that is not licensed to serve alcohol.

Illegal sale of liquor (without a license from the Maine Bureau of Alcoholic Beverages): $300 – $500 fine plus costs, plus up to 30 days in jail for the first offense.

Illegal possession with intent to sell: up to $1,000 fine and six months in jail. Any vehicle used to transfer liquor with intent to sell the liquor illegally can be seized.

Operating Under the Influence (OUI)

Maine motor vehicle law makes it a crime for any person to operate a motor vehicle in Maine under the influence of alcohol or drugs with an excessive blood-alcohol level. Penalties for first convictions are:

- If your blood-alcohol content is .08 to .14 percent:
  - 1st offense, $200 to $400
  - 2nd offense, $300 to $600
  - 3rd and subsequent offense, $600

Penalties for subsequent convictions are more severe. If you are convicted for OUI while under suspension for previous OUI, your vehicle may be seized. If you refuse to be tested, you automatically lose your license for a minimum of 275 days. Maine civil law also prohibits drinking alcoholic beverages while driving on a public road and the possession of an open container of alcohol by the driver or a passenger.

**Special Liquor Laws Relating to Minors**

**Illegal Possession of Liquor**

Any minor (a person under the age of 21 years) who is found to be in possession of alcohol, except in the scope of employment or in the minor's home in the presence of the minor's parent or guardian, is guilty of a civil infraction and shall be fined:

- 1st offense, $200 to $400
- 2nd offense, $300 to $600
- 3rd and subsequent offense, $600

**Teen Drinking Laws**

An individual under the age of 21 years shall have his/her license suspended for one year if he/she operates a motor vehicle with any alcohol in his/her blood. Refusal to submit to a chemical test will result in an eighteen month suspension of 90 days and a fine of not less than $200, plus up to 30 days in jail for the first offense. If your blood-alcohol content is .08 or more, the penalties are:

- 1st offense, loss of license for at least 90 days and a fine of not less than $400.
- 2nd offense, loss of license for at least 90 days and a fine of not less than $600.
- 3rd and subsequent offense, loss of license for at least one year.

Maine law prohibits the knowing, intentional and unauthorized possession, furnishing (distribution or giving away), and trafficking (selling) of scheduled drugs, such as cocaine, heroin, lysergic acid diethylamide (LSD), heroin, and steroids.

**Posession** can include merely allowing drugs to be kept in your room, car, or locker even though the drugs are owned by someone else.

**Furnishing** means giving drugs to another, regardless of profit. If a student on one end of a bleacher sends drugs to a student at the other end, everyone who passed the drugs and who knew (or should have known) they were passing illegal drugs is legally guilty of “furnishing” that drug. Sharing a line of cocaine with friends (even if the friends don’t pay for it) is “furnishing cocaine.”

**Aggravated furnishing** (carrying longer terms of imprisonment or greater fines) involves an aggravating factor, including but not limited to the following:

- Furnishing drugs to a minor
- Furnishing 112 grams or more of cocaine or 32 grams or more of cocaine base

MAINE ALCOHOL LAWS

An individual under the age of 21 years shall have his/her license suspended for one year if he/she operates a motor vehicle with any alcohol in his/her blood. Refusal to submit to a chemical test will result in an eighteen month suspension of a driver’s license. One can of beer, one glass of wine, or one ounce of distilled spirits can result in a blood alcohol level of .02 or more.

**Illegal Transportation**

No minor shall knowingly transport or knowingly permit to be transported alcohol in a motor vehicle under the minor’s control except in the scope of his/her employment or at the request of the minor’s parent. The penalty is a 30-day driver’s license suspension. A reinstatement fee will be charged to get a license reinstated. Points will be assessed against the offender’s driver’s license. Up to $500 fine may be assessed. A second offense results in a license suspension of 90 days and a fine of not less than $200, and subsequent offenses result in a one-year suspension and a fine of not less than $400.

*The amount of the drug possessed determines whether the crime is categorized as possession, furnishing, trafficking or aggravated trafficking.

**The court may order any person convicted of possession, furnishing, or trafficking to pay a fine in an amount up to twice the pecuniary gain he/she derived from the crime or to pay a fine equal to the value, as of the time of the offense, of the drugs involved in the offense.

***The amount of marijuana will increase the penalties. For example, the penalties for trafficking are increased to up to 5 years in jail and $5,000 fine if the amount of marijuana is 1 to 19 pounds, and up to 10 years in jail and $20,000 fine if the amount of marijuana is 20 pounds or more.

NOTE: State law allows for forfeiture of motor vehicles used in the commission of drug-related crimes. Possession of marijuana may be a civil violation.

Furnishing involving a firearm
• Prior conviction of a drug-related offense with a prison term of more than a year.

Trafficking is selling or exchanging an illegal drug and getting something in return. Trafficking also includes making, creating, manufacturing, growing, or cultivating drugs, or possessing with the intent to traffic or possessing more than a certain amount of certain drugs.

Aggravated trafficking (carrying longer terms of imprisonment or greater fines) involves an aggravating factor, including but not limited to the following:

• Trafficking within 1,000 feet of an elementary or secondary school
• Trafficking on a school bus
• Trafficking involving a minor (under 18)
• Trafficking 112 grams or more of cocaine or 32 grams more of cocaine base
• Trafficking involving a firearm
• Prior conviction of a drug-related offense with a prison term of more than a year.
FEDERAL DRUG OFFENSES

The criminal offenses most commonly charged under the Federal Controlled Substances Act are the knowing, intentional, and unauthorized creation, distribution, dispensing, or possession with intent to distribute or dispense a "counterfeit substance."

Simple possession without necessarily an intent to distribute is also forbidden by federal law and carries a penalty of imprisonment and/or a minimum $1,000 fine. Furthermore, "attempts" and/or conspiracies to distribute or possess with intent to distribute controlled substances are crimes under federal law.

Specific drug crimes carry greater penalties, including:
- the distribution of narcotics to persons under 21
- the distribution or manufacturing of narcotics near schools and colleges
- the employment of juveniles under the age of 18 in drug trafficking operations
- the distribution of controlled substances to pregnant women

The penalties for violating federal narcotic statutes vary considerably. The penalties may be more harsh based on three principal factors:
- the type of drug involved (heroin, cocaine, marijuana, LSD, etc.)
- the quantity of the drug involved
- prior conviction for a felony drug offense under Federal or State law.

With the exception of simple possession charges which result in up to one year imprisonment and/or a fine, maximum penalties for narcotic violations range up to life in prison and, in very limited circumstances, the death penalty. Certain violations carry mandatory minimum prison sentences of either 5 years or 10 years. harsher penalties will be imposed if a firearm is used in the commission of a drug offense. If a drug offense results in death or serious bodily injury to an individual who uses the drug involved, the penalties are also more harsh.

Anabolic steroids are controlled substances. Distribution or possession with intent to distribute carries a sentence of up to ten years and a $500,000 fine.

Questions sometimes arise as to what amount of narcotics found in the possession of a person is considered to be for personal use as opposed to the more serious offense of possession with intent to distribute. Federal law, as a general rule, considers anything more than a dosage unit as indicating an intent to distribute. In other words, the greater quantity possessed by the individual, the more likely it is that an individual possessed such quantity with an intent to distribute.

Alcohol abuse and drug-use problems have become a national health concern. Alcohol is a chemical. So are drugs. Any chemical is potentially harmful to someone. Some of the health risks associated with alcohol and drugs are listed below. You should contact the resources in the back of this pamphlet for additional information about health risks.

**ALCOHOL**
- Slowing down of brain function, judgment, alertness, coordination and reflexes
- Attitude and/or behavioral changes, such as uncharacteristic hostility, or increased risk taking such as driving recklessly
- Alcohol taken with other drugs can intensify the drug's effects, alter the desired effect of the drug, cause nausea, sweating, severe headache, and convulsions
- Addiction or chemical dependency
- Memory blackouts
- Uncharacteristic family, school, work, legal problems
- Physical problems such as cirrhosis of the liver
- Birth defects and mental retardation in user's children

**COCAINE**
- Destruction of nasal tissues
- Kidney damage
- Stroke
- Diseases of the lung, heart, and blood vessels
- Cardiac arrhythmia, convulsions, seizures, suppression of respiration, sudden death
- Intense anger, restlessness, paranoia, fear
- Hearing and seeing imaginary things
- Malnutrition

**LSD**
- Experiencing frightening hallucinations
- Triggering more serious problems for a person who has a history of mental or emotional instability
- Distortions of reality such as feeling that the unusual and sometimes frightening effects of the drug will somehow last forever
- Tolerance with repeated use means that increased amounts are needed to bring about the same effects
- Effects may recur ("Flashbacks") days or weeks later, even without further use of LSD
- Death may result from suicide, accident

**MARIJUANA**
- Elevated blood pressure, coughing, dryness of the mouth and throat, decrease in body temperature, sudden appetite, swollen red eyes
- Panic reaction, paranoia
- Distortions of time, reality, and perception, often impairing short-term memory

**OPIATES (including heroin, methadone, codeine, OxyContin)**
- Loss of appetite
- Severe addiction
- Infections diseases from injection, including hepatitis and HIV
- Fatal overdose

**PRESCRIPTION DRUGS**
- Opiates (most common are OxyContin, Vicodin, Valium, Xanax, Ritalin, Adderall)
- Unknown reaction or allergy
- Overdose leading to harm or fatality
- Addiction
- Seizures
- Drowsiness or trouble sleeping
- Breathing problems
- Heart problems
- Convulsion of normal body function

**STEROIDS**
- Liver disease
- Cancer
- Growth problems
- Testicular atrophy
- Bone fusions
- Acne
- Psychological problems
- Rage and uncontrolled anger
- AIDS
- Breast reduction
- Failure of secondary sex characteristics
- Sexual dysfunction, sterility (reversible), impotence
- Fetal damage
