Introduction
This guide provides information on federal and private funding programs that support activities abroad. A select number of programs for attending international meetings or conferences, or for bringing foreign researchers to U.S. institutions, are included, but this type of funding is not supported to any great extent by federal or private programs. The types of programs you will find in this guide support research abroad, international faculty and student exchanges, and U.S. research with an international focus. This guide also does not include information about domestic off-campus activities (i.e. research at government laboratories or at various centers for advanced study in the U.S.).

In addition to the programs included in this guide, there are numerous programs that allow students and faculty to travel abroad, as part of the research budget. That type of travel is an allowable cost on most research grants. Readers should keep in mind that a federal agency or private organization will support travel only as it relates to its basic mission.

The guide also focuses on programs that provide multiple awards and that are not geographically restrictive to applicants in one state or locality. However, readers are strongly encouraged to explore the availability of more local sources as a supplement or an alternative to programs identified in this guide.

Please Note: The application deadline information provided in this guide reflects the most current deadline information available at the time of publication (July 31, 2013). In most cases, readers can assume that application dates follow annual or cyclical patterns. Some programs have no application deadlines listed, indicating that proposals are accepted at any time. It is important that potential applicants contact the program officers and staff listed for each entry to obtain the most up-to-date information and deadlines of any program of interest.

Supports annually up to 20 fellows for residencies from two to six months at the University of Edinburgh. No limitation will be placed on the area of research within the humanities, inter-departmental and inter-disciplinary study is encouraged. Applications should clearly state the relationship of the project to one or more of the current research strands/themes of the Institute. Making an Edinburgh contact before submitting applications is an advantage. Most fellowships are honorary, but limited support for expenses is sometimes available. See http://www.iash.ed.ac.uk/visiting fellowships.html for details. Email: IASH@ed.ac.uk
