**Quizzes:**
There is an online quiz associated with each chapter-week. The purpose of the quizzes is to provide an incentive for you to read the chapters and be familiar with some of the concepts in each chapter. In each quiz, you will answer 20 multiple choice questions that are randomly drawn from a larger pool of questions. The content of each quiz is based on the chapter assigned to the week. You will have up to
two attempts in taking each quiz, with 60 minutes for each attempt. If you take two attempts, the higher grade will be your final grade for the quiz. The lowest quiz grade will not count toward the final grade.

Discussions:
There is one online discussion topic associated with each chapter/week. It is essential that your first posting is at least several days before the discussion forum is closed in order to allow enough time for students to comment on each other’s postings. You are expected to watch a short video and/or read a short article about a hot HR topic and share your thoughts about a couple of questions with your classmates. The purpose of the discussions is to connect you with real world HR problems and practices, and to provide you with opportunities to develop an HRM-oriented mindset. You need to post your own original, thoughtful, and systematic answers to all the questions before you can reply to others’ posts. You must comment/reply to two different classmates’ posts. When you comment on others’ posts, you need to say something different, either reinforcing or countering others’ ideas, or you can offer an alternative idea. If others commented on your posts or ask you a question, you should respond thoughtfully and timely. Please keep your posts and comments civil and directed at the issue, not the person. The specific rubrics for discussion posts can be found on Brightspace. The lowest discussion grade will not count toward the final grade.

HR Analytics Assignments:
There is one HR Analytics Assignment for each chapter-week. The purpose of these assignments is to teach you how to use Excel to perform HR related data analyses in order to aid HR decision making. HR Analytics is becoming more commonly used in today’s organizations because HRM is more and more based on scientific research and evidence. For each of the assignments, you are provided with a PPT tutorial file and an Excel file. The tutorial gives you step by step examples and the Excel file gives you the data needed for your own independent analysis. First, you need to use the Excel tutorial data to replicate the examples illustrated in the PPT file. Then, you will use the Excel practice data to answer some questions listed on the second last slide of the PPT file. The rubrics for the assignments can be found on Brightspace. The lowest HR Analytics Assignment grade will not count toward the final grade.

Midterm and Final Exams:
A Midterm Exam and a Final Exam will be given online. The purpose of the exams is to assess students’ overall understanding of the chapters covered. There will be multiple choice questions that are randomly selected out of a large pool of questions, essay questions, and HR analytics questions. More detailed instructions will be provided in the exam.

Assessment:
Students’ learning are assessed by using quizzes, discussions, HR analytics assignments, and exams. Quizzes will assess the understanding and retention of basic HR concepts and factual information. Discussion will assess the ability of applying HR knowledge to analyze HR issues. HR analytics assignments will assess the ability to use HR data to make HR decisions. The assessment criteria/rubrics for Discussions and HR Analytics Assignments are provided on Brightspace. These rubrics will be also applicable for the essay questions and the HR Analytics question in the final exam.

Grading Criteria:
Final grades will be based strictly on your point total. Grading is a very slippery slope. For the sake of fairness, no “rounding up” will occur. Please plan/prepare accordingly.

94% = A 82% = B 70% = C
90% = A- 78% = B- 65% = C-
86% = B+ 74% = C+ 60% = D

Below 60% = F
