Academic Service-Learning

Courses delivered this year incorporating service-learning components are listed below. These courses range in their depth and breadth of service-learning. Some incorporate one-time projects or optional service-learning, while others' curriculum is grounded in the pedagogy. Because hours are a quantifiable part of service, we have captured that data; this does not necessarily correlate with impact. This data is collected by staff, faculty teaching the course, and self-reported records from students serving in the community.

**Note: 2018-2019 data likely under-report actual hours of service due to missing course information
